

- Custodial Support Services
- Provides custodial services for cleaning of all LaRC facilities.
 Also including the disposal of classified documents, the gathering of boxed materials and privacy act material and placing it at pick-up points; setup/removal of furniture for meetings and events.
- 8(a)

- LaRC Information Technology Enhanced Services- Lites
- Support Service to operate and maintain most of the Central Scientific Computing Complex and all Center-wide voice, data, video communications networks and provide system administration support to computing and data reduction systems. Provides application systems development implementation and maintenance support; end-user computing support; technical support for data base/data communications, networking and operating systems; computer center support for job scheduling, computer operations, data entry, and ADP equipment maintenance; hardware and software acquisition; and management of the Information System (I.S.) program application to business and administrative computing. Provides support for computer science-related activities across all research disciplines at LaRC including supercomputer and massively parallel processor applications utilities, mathematical software, surface modeling and grid generation, image processing, mission software and training.

- Sciences Technology & Research Support Services (STARSS)
- Provides support to the Center's atmospheric sciences program in the following task areas: analytical studies, operational data processing and archiving; instrumentation, instrumentation development, field studies, administrative and logistical support; and documentation.
- Small Business Set-aside

- Simulation and Flight Information Technology Services (SAFITS)
- Provides Simulation and Flight Information Technology services for the Fight Simulation and Software Branch, Flight Research Services Directorate.
- TBD

- Technology Engineering and Aerospace Mission Support (TEAMS)
- The contractor performs all types of work in the areas of systems analysis and engineering support onsite at LaRC. Work issued via task orders in support of all LaRC competencies.
- TBD

- NASA Academy of Program/Project and Engineering Leadership Technical and Administrative Support (APPEL)
- Provide career development services including classroom instructions, performance enhancement, online tools development and cutting-edge knowledge sharing forums, activities and publications; risk management and cost containment; high-performance team development; and benchmark and promulgate best and emerging engineering and project management practices.
- 8(a)

- NASA Center for Aerospace Information (CASI)
- The Contractor provides scientific and technical information (STI) content acquisition and management and information technology (IT) support for the NASA Center for Aerospace Information in Hanover, Maryland, and content, research and web support for STI Program Office (STIPO) at NASA LaRC.
